ThreatDown Bundles

When "Good Enough" is NOT Enough

Challenges

Too many attacks are successful

88% of organizations bore the brunt of ransomware last year[1]

Threat actors linger too long

292 days on average to identify and contain a breach[2]

Multiple point solutions increase cost & complexity

70% of SMBs are in the process of or planning to consolidate software and vendors[3]

IT / security teams are understaffed

57% of organizations lack sufficient cybersecurity staff[4]

Get Better Protection in One Cost-Effective Package

ThreatDown Core

Core delivers comprehensive prevention against malware, zero-day threats, and more. **Core** includes award-winning technologies that appreciably simplify endpoint protection management.

ThreatDown Advanced

Advanced delivers superior protection in a single, easy-to-use solution at a price that makes sense. Purpose-built for organizations with small security teams with limited resources, **Advanced** includes award-winning technologies that appreciably simplify endpoint protection management.

ThreatDown Elite

Elite delivers comprehensive protection in a single solution that offers unparalleled ease of use at a price that makes sense. Purpose-built for organizations with small (to non-existent) security teams that lack the resources to address all security alerts, **Elite** includes award-winning technologies and 24x7x365 expert-managed monitoring and response.

ThreatDown Ultimate

Ultimate delivers the most comprehensive protection across the attack cycle from superior attack surface reduction to fully-managed 24x7x365 prevention, detection, response, and full remediation.

Benefits

	Core	Advanced	Elite	Ultimate
Enhance security				
Application blocking to prevent unauthorized programs from executing on Windows endpoints	✓	✓	✓	✓
Threat prevention with multi-vector protection that won't slow your devices	✓	✓	✓	✓
Attack surface reduction with vulnerability scanning and patching processes that run as scheduled or ad hoc	✓ *	✓	✓	✓
Browser phishing protection to maintain productivity and protect sensitive data	✓	✓	✓	✓
Attack detection through award-winning technology that features suspicious activity monitoring, freeform threat hunting, and Ransomware Rollback		✓	✓	✓
Accelerated response through patent-pending technology that continually scans alerts, escalating only the most critical with clear guidance on recommended response actions		✓	✓	✓
Stronger protection via centralized, easy-to-use firewall management		✓	✓	✓
24x7x365 endpoint monitoring and response by our team of cybersecurity experts with 150 years of collective experience in threat hunting, forensic analysis, and incident response			✓	✓
Security that only gets better with age because our team of experts apply their findings to refine security techniques for faster, more precise detections and alerts over time			✓	✓
Enhanced safety and productivity by restricting whole website categories of malicious sites and unwanted ones not compliant with employee code of conduct	✓ **	✓ **	✓ **	✓
Adaptive AI email threat detection and remediation stops advanced phishing attacks and their variants; all managed from the single, cloud-based ThreatDown console.	✓ **	✓ **	✓ **	✓ **
Reduce complexity				
Centralized management via cloud-based console with user-friendly interface that eliminates the need to learn multiple consoles—even when adding security capabilities	✓	✓	✓	✓
Single lightweight agent that deploys in minutes and works across all Malwarebytes products	✓	✓	✓	✓
Device visibility with color-coded cues for at-a-glance security status	✓	✓	✓	✓
Auto remediation via proprietary Linking Engine that finds and automatically removes most malware executables and associated artifacts, changes, and process alterations		✓	✓	✓
Security Operations Center (SOC) in a box with our technologies managed by our experts to augment your team's efforts			✓	✓
Enhanced support response time SLAs and extended support hours	✓ **	✓ **	✓ **	✓
Maximize value				
Fastest implementation validated by the G2 Implementation Index, which shows that our suite has the shortest go-live time of all competitive solutions	✓	✓	✓	✓
Easiest to manage validated by the G2 Usability Index, which awarded our suite "Easiest to use" for its ease of administration and use	✓	✓	✓	✓
Best ROI validated by the G2 Results Index, which awarded our suite "Best estimated ROI" of all competitive solutions	✓	✓	✓	✓
Best value one bundle, one agent, one console, one SOC (Ultimate and Elite), and one trusted partner	✓	✓	✓	✓

* ThreatDown Core provides vulnerability scanning, but not patching.

** Available with respective add-on purchase: DNS Filtering, Email Security, and Premium Support.

ThreatDown

Products & Features

	Core	Advanced	Elite	Ultimate
Endpoint Detection & Response: Award-winning solution that provides continual active detection and response, suspicious activity monitoring, integrated cloud sandbox, endpoint isolation, Ransomware Rollback, MITRE ATT&CK mapping, and Active Response Shell		✓	✓	✓
Managed Threat Hunting: Automated alert scanning that correlates EDR data against external and internal threat intelligence feeds, prioritizing threats and escalating the most critical with clear, step-by-step, response guidance		✓	✓	✓
Endpoint Protection: Multi-vector prevention built on layers of technology that stop signature-based, fileless, and zero-day attacks before they infiltrate your systems	✓	✓	✓	✓
Vulnerability Assessment: Run scans on demand or on schedule to search for operating system and application vulnerabilities	✓	✓	✓	✓
Patch Management: Automate the patching process to lock up potential access points		✓	✓	✓
Incident Response: Built on our proprietary Linking Engine that not only removes malware executables but finds and automatically eradicates all associated files and changes to prevent re-infection	✓	✓	✓	✓
Managed Detection & Response: 24x7x365 monitoring by our experts, who analyze, respond to, and remediate threats on your behalf (even those that escape technological detection)			✓	✓
Application Block: Easily block unauthorized programs to enforce acceptable-use policies	✓	✓	✓	✓
Browser Phishing Protection: Browser extension that blocks drive-by downloads, phishing attacks, malicious links, and credential harvesting to protect sensitive data	✓	✓	✓	✓
31-day lookbacks: Our team of experts search for Indicators of Compromise to stop attacks and refine detections and alerts going forward			✓	✓
DNS Filtering: Block whole categories of inappropriate, suspicious, and malicious websites	✓**	✓**	✓**	✓
Premium Support: Enhanced support response time SLAs and extended support hours	✓**	✓**	✓**	✓
Email Security: Adaptive AI email threat detection and remediation stops advanced phishing attacks and their variants; all managed from the single, cloud-based ThreatDown console.	✓**	✓**	✓**	✓**
